Subject: Comments on Microsoft settlement from Orlando

To the Department of justice ?

I have followed this action, and I feel that the nine sates that are mounting a separate settlement effort, are on an agenda to line their pockets with false hopes of income. It seems that dissent will always be a part of any settlement, and we must move forward to quickly finish this case, and move on.

Please implement the terms of the settlement, and minimize the expense of the on-going litigation from Florida.
